

How to find first and last digit of a number

```
include <stdio.h>
```

```
int main() {
```

```
    int number, lastDigit;
```

```
    printf("Enter a number: ");
```

```
    scanf("%d", &number);
```

```
    lastDigit = number % 10
```

```
    printf("The last digit is : %d\n", lastDigit);
```

```
    return 0;
```

```
}
```

Output:-

12345 -

lastDigit = 5
